

Welcome to Ostrava

Dear Colleagues,

turbinate and nasal septal surgery are very frequent, daily performed, routine surgical procedures. However, sometimes it is not so easy to perform it with good results, even for a skilled surgeon. Moreover, septal surgery, which is usually performed without an endoscope, can often be problematic to learn and perform for younger surgeons. Endoscopic endonasal surgery, including lacrimal and orbital surgery techniques are rapidly developing and allow us to perform both radical surgery and more conservative procedures.

Basic knowledge, tips and tricks during live surgery as well as presentations on interesting topics will be presented by experts.

The city of Ostrava offers much more than just a surgical course. You can also take the opportunity to explore Ostrava's historical industrial sites by visiting interesting locations and enjoy being among colleagues.

We are looking forward to welcoming you to Ostrava and to experiencing a scientifically and personally enriching meeting together.

Prof. P. Komínek, MD, PhD, MBA

Chairman

Prof. Pavel Komínek, MD, PhD, MBA

Chair, Department of Otorhinolaryngology and Head and Neck Surgery, Ostrava, Czech Republic

Coordinator

Petr Matoušek, MD, PhD, MBA

Vice-Chair, Department of Otorhinolaryngology and Head and Neck Surgery, Ostrava, Czech Republic

Programme
